README – EX1 – 212727283, 207992967

How to run:
Step 1: Type "make" to compile and create .o files.
Step 2: Run Server with "./Server" command.
Step 3: Run Shell with "./Shell" command.

All done. Now you can initiate all the commands.

*In order to copy a file, we have a folder named "a" which has the file to copy named "test.txt".
We have another folder named "b" which is the destination folder.
